

LAGUNA

DC:15

DUST COLLECTOR

The Laguna DC:15 is perfect for shops where localized dust collection is needed. A 1.5 HP motor provides plenty of suction through two 4" inlets. A 2 micron pleated cartridge filter, along with its filter cleaning bar and particle separating disc extends the life of the filter. We added an anti-racking plate to the front of the dust collector and a convenient transport handle for effortless movement to anywhere in your shop. The DC:15 is budget friendly and will provide years of steady use.
